

9405

Pure Herbal Extracts

COMBINATION OF CHINESE MEDICINE & WESTERN MEDICINE

PREVENTING CANCERS, KIDNEY DISEASES (DIALYSIS), HEPATITIS

9405 Is Very Helpful To Those High-Risk Patients of Cancer

1. Heavy Smokers
2. Patients with Chronic Hepatitis
3. Patients with Liver Cirrhosis
4. Family History

Obtained "excellent Product Award"
by W.F.A.S & W.H.O. World Superior
Traditional Medical Products Fairs, 1996

---Everyone has only one life to live---

Why don't you try the excellent auxiliary treatment -- 9405 which has no side-effect & no harm (Please don't stop the Western-medical therapies). You can feel the helpfulness of 9405 sooner.

We can't exaggerate the efficacies of 9405 for conscience's sake, we just declare the fact which has been proven.

9405 was created on the basis of Chinese traditional medicine that has been passed down for hundreds of years and has had outstanding success in treating lung cancer, other forms of cancer and lung abscesses. Thanks to the efforts of a group of well-know Chinese pharmacological specialists and the clinical experience of famous specialists in traditional Chinese medicine, the efficacy of 9405 has been put on a modern scientific basis.

9405 has the outstanding non-invasive & anti-metastatic effect against malignant tumor. It also has an excellent protective effect on bone marrow inhibition induced by chemotherapeutic agents.

COMPOSITION

- Vitamins A 、 C & E.
- Chinese Caterpillar Fungus (Cordyceps Sinensis)
- Ginseng (root) (Panax) Ginsenoside Rh2
- Lucid Ganoderma (entire plant) (Ganoderma Japonicum)
- Astragalus (root) (Astragalus Membranaceus)
- Wolfberry (fruit) (Lycium barbarum)
- Licorice (root) (Glycyrrhiza Uariensis)

FUNCTION

Prevention & auxiliary treatment of cancer, poor renal function, dialysis, chronic hepatitis

ACTION

1. Significant anti-tumor, anti-invasion and anti-metastatic effects
2. Preventing cancer metastasis, serving as the pre- and post- surgery adjunct therapy, alleviating the side effects of chemotherapy
3. Excellent protective effect of bone marrow inhibition induced by chemotherapeutic agents
4. Activation of lymphoblast cells and enhancing the cellular immunity function
5. Auxiliary treatment of chronic renal failure, increasing the resistance to diseases
6. Prevention & treatment of hepatitis, chronic hepatitis, liver cirrhosis
7. Protection & treatment of high-risk patients of cancer

DOSAGE

Three times a day, 4-5 capsules once (500mg/cap)
(For prevention:once a day)

9405

Pure Herbal Extracts

The aims of all medicine-Chinese Medicine and Western Medicine, are the same: to cure diseases and save people's lives. To treat patients properly, doctors should be broad-minded and learn to complement the merits and shortcomings of the two.

In May 1994, Prof. Han Rai (one of the pharmaceutical consultants of W.H.O.) and some Chinese pharmaceutical scientists published a preparation --- 9405 to be the best auxiliary treatment for cancer, renal diseases, dialysis, hepatitis and chronic hepatitis. This experiment was performed with the cooperation of the Institute of Materia Medica & the Chinese Academy of Medical Science (China) and Toyama Medical & Pharmaceutical University (Japan). Their study has gained the attention of the scientists all over the world.

In the preparation of 9405, there is full consideration merits and insufficiencies of western medical therapies in cancer, renal disease (dialysis), and the particular advantages of Chinese medicine. Those specialists were aware of low immunity functions, toxicity, side effects, and the uncomfortable symptoms that accompany western Chemotherapies and the life-quality of patients.

It is necessary to do experiments to find out the most appropriate complement both Chinese & Western medical theories.

9405 has the outstanding anti-invasion and anti-metastatic effects and can exert protective action on bone marrow inhibition induced by chemotherapeutic agents, activation of lymphoblast cells' enhancing the cellular immunity function, providing the best quality of life to the patients. And 9405 can increase the resistance to diseases, and prevent detrimental colds to the seriously ill patient.

9405 can significantly decrease renal failure, serum urea nitrogen, creatinine and methylguanidine; increase the excretion of urea, creatinine and electrolytes, from urine; accelerate the blood flow of kidneys, decrease the blood pressure. 9405 can improve the kidney hemodynamics and electrolytes metabolism, and ameliorate the uremic symptoms.

Histopathological examination revealed that 9405 can inhibit the proliferation of cultured human mesangial cells significantly and delay the glomerulosclerosis and interstitial damage of renal tubules to decrease the serum urea nitrogen improving the hypoalbuminemia and hypoproteinemia.

This means that renal failure was improved and a further deterioration was prevented.

The animal (rats) experiments of Toyama Medical & Pharmaceutical University (Japan) demonstrated that 9405 can decrease the blood level of urea nitrogen, creatinine and methylguanidine of serum in partially nephrectomized rats after administrating 9405 for 90 days.

In Asia, hepatitis is a common disease. 9405 can reduce blood serum GPT and GOT, normalizing the liver function. And it is clarified that 9405 has the excellent efficacy to the dialyzed patients who has hepatitis or chronic hepatitis.

According to the studies and clinical experience, the cures of the serious illness, especially the cancers, renal diseases, hepatitis, will be better if the patients take the combinative therapy of Western Medicine and Chinese Medicine earlier.

As everyone has only one life to live, it is reasonable to take steps to respect life.

**Do you adopt the single method or
choose the double opportunities ?**
